## Retraction

The article "miR-155-5p is Negatively Associated with Acute Pancreatitis and Inversely Regulates Pancreatic Acinar Cell Progression by Targeting Rela and Traf3" [Cellular Physiology and Biochemistry (2018) 51 (4): 1584–1599. https://doi.org/10.1159/000495648] by Sulai Liu, Honglian Zou, Yonggang Wang, Xiaohui Duan, Chen Chen, Wei Cheng, Le Wang, Ning Ning, Hongying Tang, Meifu Chen, Xianhai Mao, Chuang Peng, Hao Li, Yu Jiang and Bo Jiang has been retracted by the current and former Publishers and the Editor.

After the publication of this article, image duplication was identified between Figure 5B Rela and Figure 6C Ptgs2. An Expression of Concern was published while the investigation was ongoing [1].

The corresponding author was asked to comment on the above and provide the original data for the study. Review of the original data raised further concerns about data acquisition and management which undermined the reliability of the results in the article and therefore, the article has been retracted.

The authors did not respond to our correspondence about the retraction of this article within the timeframe specified.
